BRISVORA – PRODUCT REQUIREMENTS DOCUMENT (PRD)

Product Name

BRISVORA

Tagline: *Your Growth OS*

Vision

Brisvora is an AI-powered Growth Operating System designed to help businesses grow digitally with minimal effort.

Our mission is not to build another CRM or website builder.

Our mission is to become the first platform every business uses to establish and grow its online presence.

Every feature developed inside Brisvora must answer one question:

"Will this help businesses grow?"

If the answer is yes, it belongs in Brisvora.

Long Term Vision

Brisvora should become the single platform where any business can:

- Create Landing Pages
- Create Websites
- Generate Leads
- Improve SEO
- Manage Leads
- Use AI
- Track Analytics
- Run Marketing
- Automate Communication

Eventually Brisvora should become a complete Business Growth Operating System.

Version 1 (MVP)

Objective

Allow any business owner to create an AI-powered, SEO-ready landing page in under one minute.

This is our acquisition engine.

User Journey

Step 1

Customer visits

Brisvora Website

OR

Brisvora WhatsApp

Step 2

AI asks simple questions

Business Name

Business Category

Location

Description

Upload Images

Upload Videos

Contact Number

WhatsApp Number

Email

Logo (optional)

Step 3

AI generates

- Professional Landing Page
- Mobile Responsive Design
- SEO Title
- SEO Description
- Meta Tags
- Open Graph Tags
- Canonical URL
- Structured Schema
- FAQ Section
- Contact Form
- CTA Buttons
- WhatsApp Button
- Google Maps
- Image Optimization
- Internal URL Structure

Everything should be generated automatically.

Step 4

Customer clicks

Publish

System asks for

- Name
- Business Name
- Phone Number
- Email

OTP Verification

Automatic Signup

Automatic Login

Step 5

Dashboard is automatically created.

Dashboard should contain

Landing Pages

Analytics

Leads

SEO Status

Settings

Profile

Billing

Landing Page Features

Every landing page should include

Professional Hero Section

Gallery

Videos

About Business

Services

Features

FAQ

Testimonials (optional)

Google Maps

Lead Form

WhatsApp CTA

Call CTA

SEO Optimized URL

Example

/business/skin-clinic-mumbai

/business/2bhk-ambarnath

/business/interior-designer-pune

SEO

Every landing page should automatically generate

SEO Title

Meta Description

Schema Markup

Sitemap

Robots

Image ALT Tags

Open Graph

Twitter Cards

Canonical URL

Structured URLs

Every page should be indexable by Google.

Analytics

Dashboard should show

Visitors

Page Views

Unique Visitors

Leads Generated

WhatsApp Clicks

Call Clicks

Form Submissions

Traffic Sources

Google Clicks

Top Performing Pages

Account System

Every published landing page automatically creates

User Account

Dashboard

Analytics

Lead Database

Future CRM

Version 2

Growth Tools

Media Plan Calculator

Cost Per Lead Calculator

ROI Calculator

ROAS Calculator

Marketing Budget Calculator

Website Cost Calculator

These tools should be free and SEO-friendly to attract organic traffic.

Version 3

Agency Pricing Intelligence

Users can compare

Website Pricing

SEO Pricing

Social Media Pricing

Meta Ads Pricing

Google Ads Pricing

According to

City

Pincode

Industry

Purpose

Help users understand whether they are paying fair market rates.

Version 4

Lead Management

When someone submits a lead

Landing Page

↓

Lead Database

↓

Dashboard

↓

Instant WhatsApp Notification

↓

Email Notification

↓

Future CRM

Initially WhatsApp integration can use Aisensy as the messaging gateway.

All business logic must remain inside Brisvora.

Version 5

AI Sales Assistant

Instead of a simple chatbot

Create an AI Assistant capable of

Answering FAQs

Qualifying Leads

Capturing Customer Requirements

Booking Meetings

Sending Brochures

Collecting Contact Details

Transferring Qualified Leads

The AI Assistant should improve lead conversion.

Version 6

AI Website Builder

User provides

Business Description

Images

Videos

Brand Colours

Services

Location

AI generates

Complete Website

Multiple Pages

SEO

Blog

Contact

Gallery

Lead Forms

Hosted on Brisvora.

Technical Architecture

Frontend

Next.js

Backend

NestJS

Database

PostgreSQL

Authentication

JWT

Cloud Storage

Cloudinary

Hosting

AWS

Payments

Razorpay

AI

OpenAI

WhatsApp (Initial)

Aisensy API

Future

Meta Cloud API

Important Technical Rule

Never directly integrate modules with Aisensy.

Create an internal abstraction layer.

Example

WhatsAppService

↓

Aisensy Provider

Future

WhatsAppService

↓

Meta Cloud API Provider

This ensures migration without rewriting the application.

Development Principles

Every feature should

Be AI-first

Be Mobile-first

Be SEO-first

Load quickly

Be scalable

Support multi-tenancy

Be reusable

Support future modules

Product Philosophy

Brisvora is not a CRM.

Brisvora is not a Landing Page Builder.

Brisvora is not a Website Builder.

Brisvora is a Growth Operating System.

Every module should ultimately help businesses:

Get More Traffic

Generate More Leads

Convert More Customers

Grow Faster

Final Product Statement

Brisvora is an AI-powered Growth Operating System that enables any business to launch an SEO-ready online presence, generate leads, analyze performance, automate customer engagement, and scale their growth from a single platform.
